

Website Corrections & To-Do List

buddy4plant.in · status on 30 September 2026

Everything still to be corrected or completed on the website, including the admin panel, the Gardening Services enquiry form and the About Us page. Each item says **where** it is, **what to do**, how **urgent** it is, and **who** acts: **You** = a decision or information from you; **Dev** = a code change (developer); **Both** = you supply the detail, then the code is updated. Findings come from a check of the project code and the running site on localhost.

Critical	High	Medium	Low	Total items

Top 5 to do first

1. Lock the Firebase database (A2) and replace the admin login (A1).
2. Send the real phone/WhatsApp number, Lucknow address and email (B1-B4, D2).
3. Rewrite About Us and connect it to the admin editor (C1-C3).
4. Remove template claims: fake reviews and ratings, Bengaluru references, the Thornfield jar image (E4, F1-F5, G1).
5. Create Privacy, Terms and Refund pages, then activate live Razorpay (H1-H2, A3).

A. Security & payments (must fix before going live)

These affect customer data, your money or control of the website. None of them are visible in normal use, which is why they are easy to miss.

#	Issue	Where	What to do	Priority	Who
A1	Admin login is written inside the website code	AdminLoginPage.tsx	The admin ID and password are stored in the page code, so anyone technical can read them from the browser. The "logged in" state is only a browser flag. Replace with a proper Firebase Authentication login (your email + password, or Google sign-in) and allow only listed admin accounts.	Critical	Both
A2	Database is open to everyone	firestore.rules	Every collection (products, prices, orders, customer names/phones/addresses, service enquiries, coupons, users, even the admins list) is set to "anyone can read and write". A visitor could change prices, delete orders or download customer details. Lock it down: public can read the catalogue only; customers can create orders/enquiries but not read others'; only admins can edit.	Critical	Dev
A3	Online payments are auto-approved if the Razorpay secret is missing	server.ts (verify-payment)	In "simulator" mode the server marks every payment as successful. On the live site it must reject payments when the secret key is not set. Turn off Sandbox mode, add your live Razorpay keys (after Razorpay KYC) and do one real ₹1 test payment. The saved key "rzp_test_VanaDemo2026" is a placeholder.	Critical	Both
A4	"Admin Portal & CMS" link is shown to all visitors	Footer (appears twice)	Remove the public admin links from the footer. You can still open the admin panel by typing /b4padmin.	High	Dev
A5	Test orders and test data	Admin > Orders	Delete test order B4P-418542 and any other test orders/enquiries before launch so reports start clean.	Medium	You

B. Business & contact details (placeholders still showing)

The template this site was built from was for a Bengaluru plant shop. Several of its details are still on the site.

#	Issue	Where	What to do	Priority	Who
B1	WhatsApp / phone number is a placeholder: +91 98765 43210	Settings default + typed directly into 9 places	Appears on Contact, Plant Doctor, Shipping Policy, My Orders, Footer, Gardening Services (Call + WhatsApp buttons), Projects and Home page. Send the real number; every page should then read it from Admin > Settings so you only change it in one place.	Critical	Both
B2	Store address is "42 Greenway Pavilion, Indiranagar, Bengaluru"	Store settings	Change to your Lucknow nursery/office address. The address is not editable in Admin > Settings, so add that field.	High	Both
B3	Contact Us page says "Western Ghats Botanical Reserve" and "Bengaluru & Pune Hubs"	/contact	Rewrite with your Lucknow address, working hours, Google Map, phone and email. Make it read from Settings. Optional: add a simple contact form.	High	Both

#	Issue	Where	What to do	Priority	Who
B4	Two different email addresses and a domain mismatch	Site-wide	Pages use both care@buddy4plant.com and support@buddy4plant.com, while the SEO setup uses the domain buddy4plant.in. Confirm the domain you own and which email mailbox actually exists; use one email everywhere.	High	You
B5	Social media links are generic	Footer + Settings	Footer icons go to instagram.com / facebook.com / youtube.com home pages. Send your real page links, or the icons will be hidden.	Medium	You
B6	Orders show "Bengaluru" as the dispatch hub	Order tracking, Order success, Admin > Orders, Checkout	Default tracking location "Bengaluru Central Botanical Nursery Hub" and the checkout City example "Bengaluru". Change to Lucknow.	High	Dev

C. About Us page

Important: the About Us editor in the admin panel saves your text, but the public About page does not use it, so edits never appear.

#	Issue	Where	What to do	Priority	Who
C1	Admin "About us" edits never show on the website	AboutUsPage (StaticPages.tsx) + AdminAboutUs.tsx	Connect the public page to the saved admin content (title, subtitle, story, 3 metrics), so what you type in admin is what visitors see.	High	Dev
C2	Story text is wrong for your business	/about	Currently: "grown in our eco-controlled greenhouses across Western Ghats and Bengaluru". Rewrite for Buddy4Plant: Lucknow nursery + landscaping company, year started, founder/team, what you grow, service area (Lucknow, Kanpur, UP), and the kind of clients you work for (government, institutes, industry, homes).	High	You
C3	Claims in the 3 metric boxes	/about	"0% single-use plastics / 100% recyclable honeycomb board", "7 Days transit guarantee" and "24x7 Plant Doctor, certified botanists". Keep only what is actually true; the 7-day figure also conflicts with the 14-day guarantee elsewhere (see F3).	High	You
C4	Add real photos and credibility	/about	Nursery photos, team photo, a few project photos linking to the Projects page, and your registered business name.	Medium	You
C5	Page title for Google	/about	About (and Contact, Plant Doctor, Reviews, Care Guide, Shipping) still use the default browser title. Add proper titles/descriptions.	Low	Dev

D. Gardening Services page & enquiry form

The form itself works: it checks the phone number, saves the enquiry to Firebase (with a copy in the browser if the internet drops) and shows it in Admin > Service Enquiries. What is missing is around it.

#	Issue	Where	What to do	Priority	Who
D1	Nobody is told when a new enquiry arrives	Enquiry form	Right now you only see enquiries if you open the admin panel. Add an instant alert to your email (and/or WhatsApp) for each new enquiry.	High	Both
D2	Call and WhatsApp buttons use the placeholder number	Gardening Services contact card	"Call us" dials +91 98765 43210. Fixed automatically once B1 is done.	Critical	Both
D3	Enquiry details are publicly readable	Firebase	Names and phone numbers from the form sit in an open collection. Fixed by A2.	Critical	Dev

#	Issue	Where	What to do	Priority	Who
D4	No spam protection	Enquiry form	Add a hidden "honeypot" field and a limit on repeated submissions so bots cannot flood the enquiries list.	Medium	Dev
D5	Admin enquiries tab is basic	Admin > Service Enquiries	Currently: list + status (new / contacted / closed). Add: delete, notes and follow-up date, filter by type/city, and export to Excel.	Medium	Dev
D6	Confirm the promises on the page	/garden-services	"Free site visit in Lucknow & Kanpur", service area and response time. If you want, add AMC package details or "starting from" prices.	Low	You

E. Admin panel

All 14 admin tabs were checked earlier and work (products, pots, care, gifting, blog, gardening projects, about, orders, categories, reviews, coupons, settings, enquiries, home page). These are the remaining issues.

#	Issue	Where	What to do	Priority	Who
E1	Secure login	Admin login	See A1.	Critical	Both
E2	Dashboard shows a fake growth figure	Admin > Overview	" +18.4% from last month" is fixed text. Calculate it from real orders or remove it.	Medium	Dev
E3	Coupons show made-up usage counts	Admin > Coupons	WELCOME10 "used 142 times", GREEN15 "78", MONSOON500 "33". Reset to 0. Confirm you want these offers; WELCOME10 is advertised in the top ticker.	Medium	Both
E4	Sample customer reviews	Admin > Reviews, Home page, /reviews	3 invented reviews (Ananya Sharma, Rohit Verma, Priya Iyer; example.com emails; "arriving in Bengaluru") are shown as "Verified". Delete them and only publish real reviews; add "approve before showing".	High	Both
E5	Settings tab is missing fields	Admin > Settings	Add: store address, phone number (separate from WhatsApp), social media links, GSTIN, business hours. Make every page use these.	High	Dev
E6	Placeholder prices on your own products	Admin > Products	Please confirm: Square Table Pot (White) ₹149 · Side Self-Watering Planter ₹149 · Ambience Pot 6" ₹199 · Flower Table Pot ₹99 · Plant Food (Protection + Nutrition) ₹299 · Vermicompost 50 kg ₹1,499.	High	You
E7	Stock quantities are sample numbers	Admin > Products	Each product has an example stock count (e.g. 20, 27). Enter real stock, or tell us to switch stock tracking off.	Medium	You
E8	Check admin changes on a second device	Whole admin	Some data is cached in the browser. After A2 is done, edit a product on one computer and confirm it changes on your phone. Also check that image uploads work once admin uses a real login (Firebase Storage needs it).	Medium	Dev

F. Home page & site-wide content

Many claims came with the template. Keep only what is true for Buddy4Plant; unverifiable claims are a legal and trust risk.

#	Issue	Where	What to do	Priority	Who
F1	Hero rating "4.9 / 5 · 15,000+ Happy Plant Parents"	Home hero	Uses stock face photos. Replace with real numbers or remove.	High	You

#	Issue	Where	What to do	Priority	Who
F2	Delivery coverage claims don't match	Top ticker, Shipping page	Ticker says "25,000+ pincodes", Shipping page says "19,000+ PIN codes" and names Bluedart, Delhivery, DTDC and Shadowfax. Confirm your real courier(s) and coverage.	High	You
F3	Guarantee period mismatch: 7 days vs 14 days	Hero, About, Footer, Shipping	Hero and About say 7-day; footer and Shipping heading say 14-day; Shipping text says claim within 7 days. Choose one policy.	High	You
F4	Hero slide shows another brand's product	Home hero, slide 2	The jar in the picture is labelled "THORNFIELD Botanical Face" (a cosmetic). Replace with a photo of Buddy4Plant Plant Food.	High	Both
F5	"What's Inside" ingredients	Home page section	Lists kelp/moss elixir, neem nectar, "Origin: Western Ghats". Must match the real ingredients of your Plant Food, or be removed.	High	You
F6	Plant Doctor claims	Home banner, /plant-doctor	"Certified horticulturists", "24x7". Keep only if true.	Medium	You
F7	Sign-out popup text	Sign-out window	Shows "Amazon-Style Authentication Protocol". Remove.	Low	Dev
F8	Newsletter signup does nothing	Footer	The email typed in is not saved anywhere. Connect it to a list (Firebase / Mailchimp) or remove the box.	Medium	Both
F9	Sample projects in Bengaluru / Delhi	Home "Projects" section	If loading your projects fails, the section falls back to template projects (Indiranagar, Whitefield, Greater Kailash). Remove the fallback.	Medium	Dev
F10	Remaining stock (Unsplash) photos	Categories, Shop by Space, promo banner, hero avatars	Replace with your own photos where possible.	Low	Both

G. Products, prices & checkout

#	Issue	Where	What to do	Priority	Who
G1	Every product shows an invented star rating and review count	All 385 products	e.g. "4.4 ★ (12 reviews)" with no real reviews behind them. Hide ratings until genuine reviews exist; fake reviews breach Indian consumer-protection rules for online sellers.	High	Dev
G2	"% OFF" prices	Product cards	Discounts are calculated from a "compare-at" price. Confirm these are genuine MRPs.	Medium	You
G3	GST added on top at checkout (5% on everything)	Checkout	Live plants, pots and fertilisers may carry different GST rates. Confirm with your CA; preferably show prices inclusive of GST.	High	You
G4	Delivery & COD rules	Admin > Settings	Currently ₹99 delivery, free above ₹999, COD ₹299-₹5,000. Confirm.	Medium	You
G5	Order notifications	Orders	Send an email/WhatsApp to you for each new order, and a confirmation to the customer.	Medium	Dev

H. Legal pages & policies

Razorpay requires these pages before activating live payments.

#	Issue	Where	What to do	Priority	Who
H1	Privacy Policy and Terms pages don't exist	Footer links /privacy-policy, /terms	The links open the home page. Create both pages (India's DPDP Act applies to customer data).	Critical	Both
H2	Refund & Cancellation policy	New page	Needed by Razorpay; cover plants, pots, landscaping advances.	High	Both
H3	Shipping policy rewrite	/shipping-policy	Lucknow dispatch, real timelines, courier, damage-claim process (after F2/F3 decisions).	High	Both
H4	Legal business name / GSTIN	Footer, invoices	Show registered business name and GSTIN (if registered).	Medium	You

I. Launch, SEO & housekeeping

#	Issue	Where	What to do	Priority	Who
I1	Choose hosting and go live	Deployment	The site needs a Node.js host (e.g. Render, Railway, Google Cloud Run or a VPS). Set the environment keys, run the build, connect the domain with HTTPS.	High	Both
I2	Confirm domain for SEO	sitemap.xml, robots.txt, meta tags	All SEO files use https://buddy4plant.in. If the domain is different, regenerate them.	High	You
I3	Google setup	After launch	Google Search Console (submit sitemap), Google Business Profile for the Lucknow nursery, Google Analytics.	Medium	You
I4	Browser-tab icon	favicon	At tiny size the "buddy4plant" lettering in the logo is unreadable. A tree-only version would look sharper.	Low	Both
I5	Unused AI (Gemini) package	package.json / .env	Left over from the template and not used by the site. Remove.	Low	Dev
I6	Tidy the project folder	Project root	Delete _to_delete, old photo zips, prompt files, "Claude outputs" and scratch folders (they are not part of the website).	Low	You
I7	Backups	Firebase	Turn on scheduled Firestore exports so orders and products can be restored.	Low	Dev

J. Information needed from you

Once these are sent, most Dev items above can be finished in one pass.

- ☐ Real phone and WhatsApp numbers
- ☐ Lucknow address, Google Maps link and business hours
- ☐ Domain name you own, and the one email address to use
- ☐ Instagram / Facebook / YouTube links
- ☐ Registered business name and GSTIN (if any)
- ☐ Correct prices for your 6 own products (see E6)
- ☐ Guarantee period: 7 or 14 days, and the claim process
- ☐ Courier partner(s) and delivery coverage
- ☐ About Us story: year started, founder/team, photos
- ☐ Real Plant Food ingredients
- ☐ Which claims are true: 15,000+ customers, 4.9 rating, 24x7, certified horticulturists, plastic-free packaging
- ☐ Coupons to keep (WELCOME10, GREEN15, MONSOON500)
- ☐ GST treatment (from your CA)
- ☐ Razorpay live account (KYC) keys
- ☐ Email to receive enquiry and order alerts
- ☐ Hosting choice

K. Already completed

- ✓ All 183 plant photos, 112 pots, 80 plant-care products and 81 gifting products now use Buddy4Plant photos (0 stock photos left in these sections).
- ✓ Official Buddy4Plant logo added to header, menus, admin, sign-in, blog avatars, browser tab and phone home-screen icon.
- ✓ Gardening Services page (renamed from Landscaping) with 15 real projects, animations, enquiry form and Admin > Service Enquiries.
- ✓ SEO: 10 pillar blog articles, sitemap (434 pages), robots.txt, Google structured data, per-page titles for products, categories, blog and services.
- ✓ Admin fixes: plants/pots sorted by category (no plants missing), editing no longer changes prices or drops colours/material, new fields (full description, colours, material, tags), projects editor with client and sites.
- ✓ Fixed: /track-order crash, "All Plants" count (183), Shop by Location menu closing on hover.
- ✓ Full check of 52 pages and 14 admin tabs with no errors.
